# AWG Banner Phtotoshop

This lesson will use photoshop and indesign to create a banner for AWG

Setup your work environment

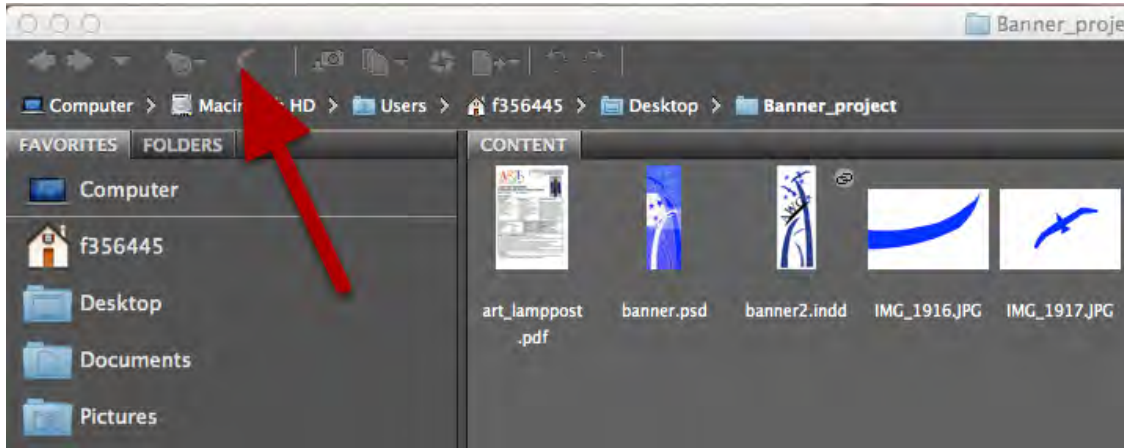

Load your images in Bridges
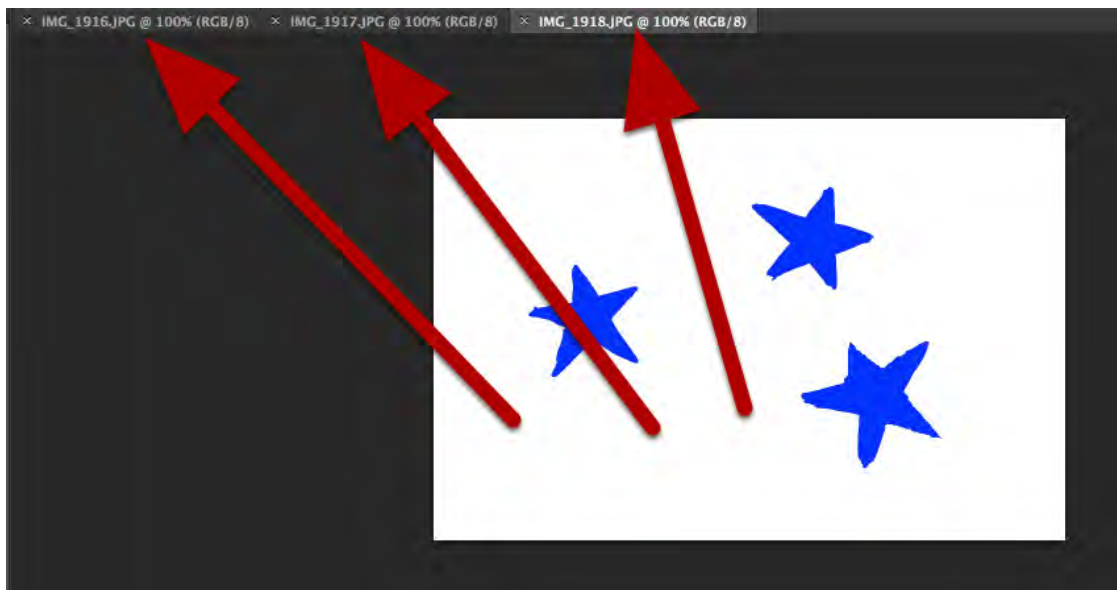

**Locate images and then Return to Photoshop by pressing the boomerang.**

**Open each template image**

**Start with the thorn shape and rotate and erase the background using the background erase tool.**

Use the magic wand to select the thorn, then go to Select in the menu and choose Inverse

**Use the Background Erase tool to erase the background.**

Go to select and select the inverse again, Choose Filter and Filter Gallery
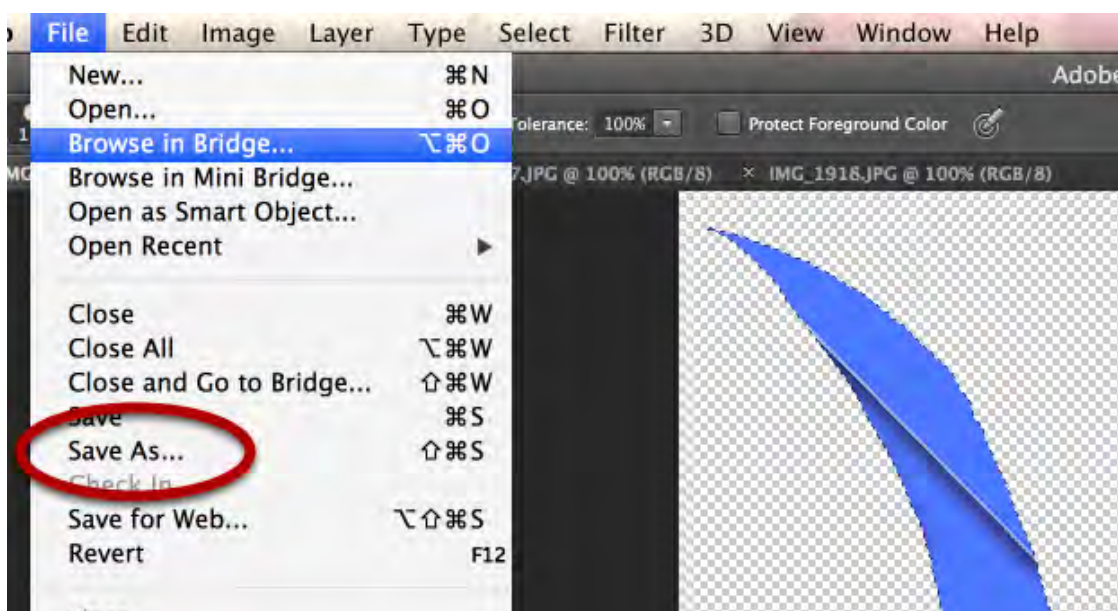

## Select a filter and continue to adjust until you like the looks of the filter.

You can layer a filter on top of another filter by adding the paper at the bottom of the screen.

## Time to save the image Go to File Save As
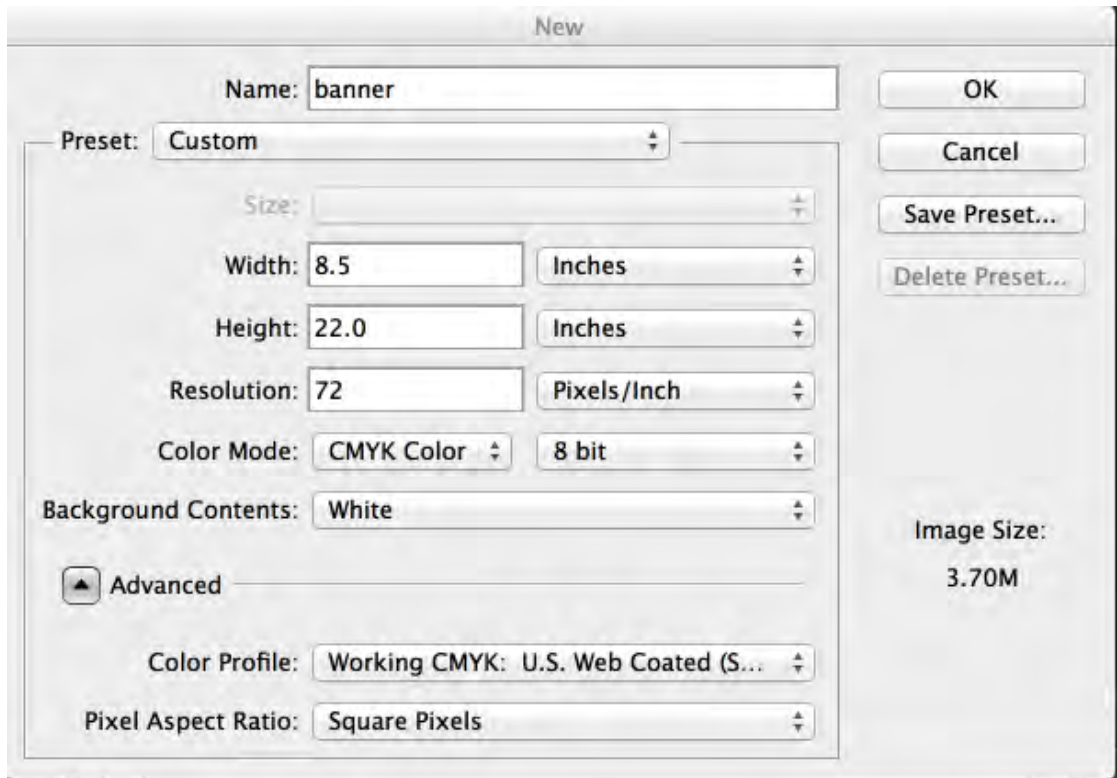

Save as Photoshop and Template 1

Repeat this process so you have 3 images for each element.

You can either start with the base image or continue to work from the modified image.

Open a new document with the following settings

New

Name: banner

Preset: Custom

Size:

Width: 8.5 — Inches

Height: 22.0 — Inches

Resolution: 72 — Pixels/Inch

Color Mode: CMYK Color — 8 bit

Background Contents: White

▲ Advanced

Color Profile: Working CMYK: U.S. Web Coated (S...

Pixel Aspect Ratio: Square Pixels

OK

Cancel

Save Preset...
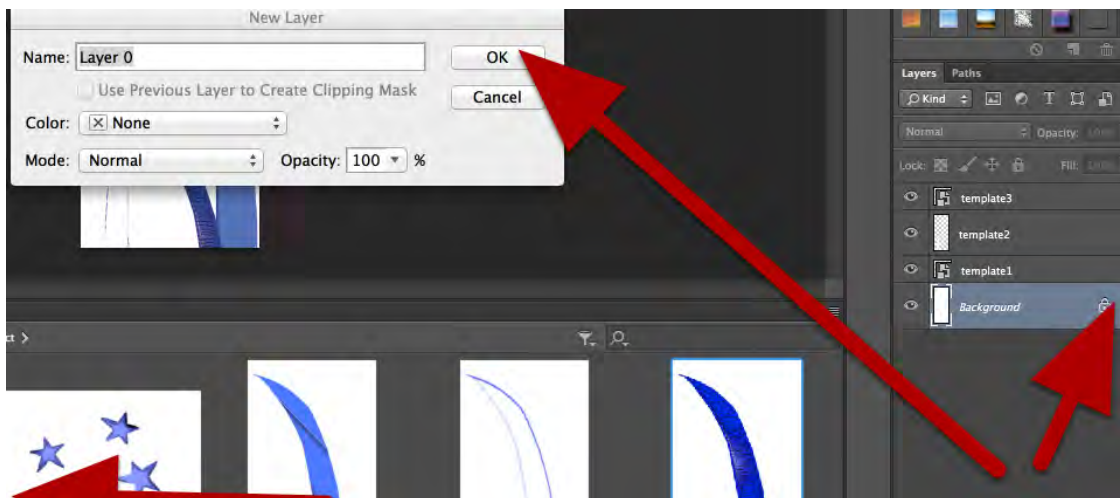

Delete Preset...

Image Size:
3.70M

Drag and Drop the images that you created from your bridge to the new document.

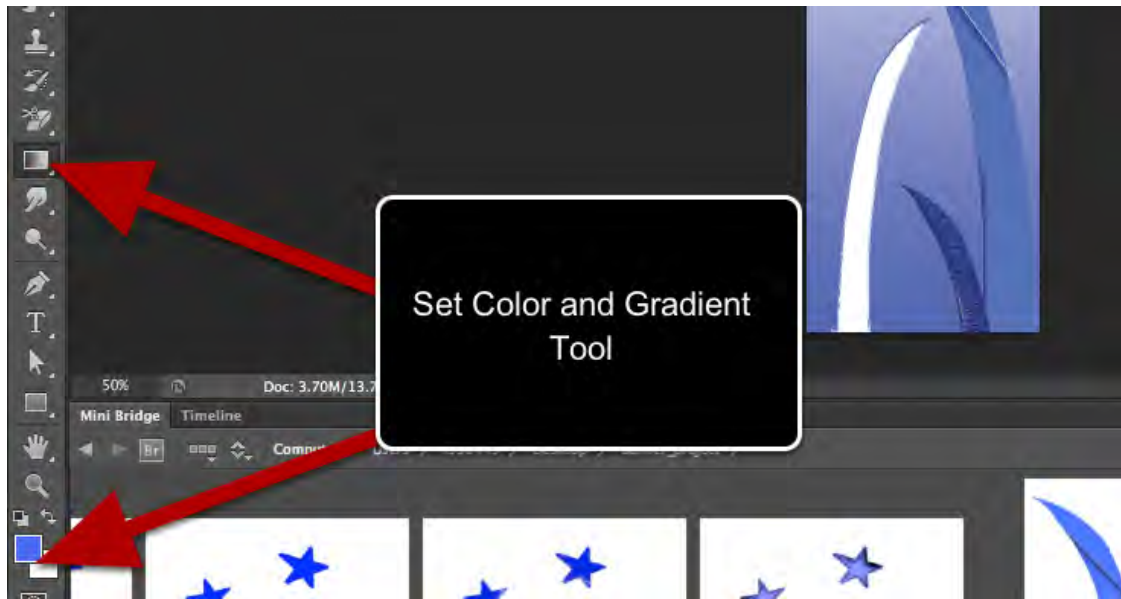

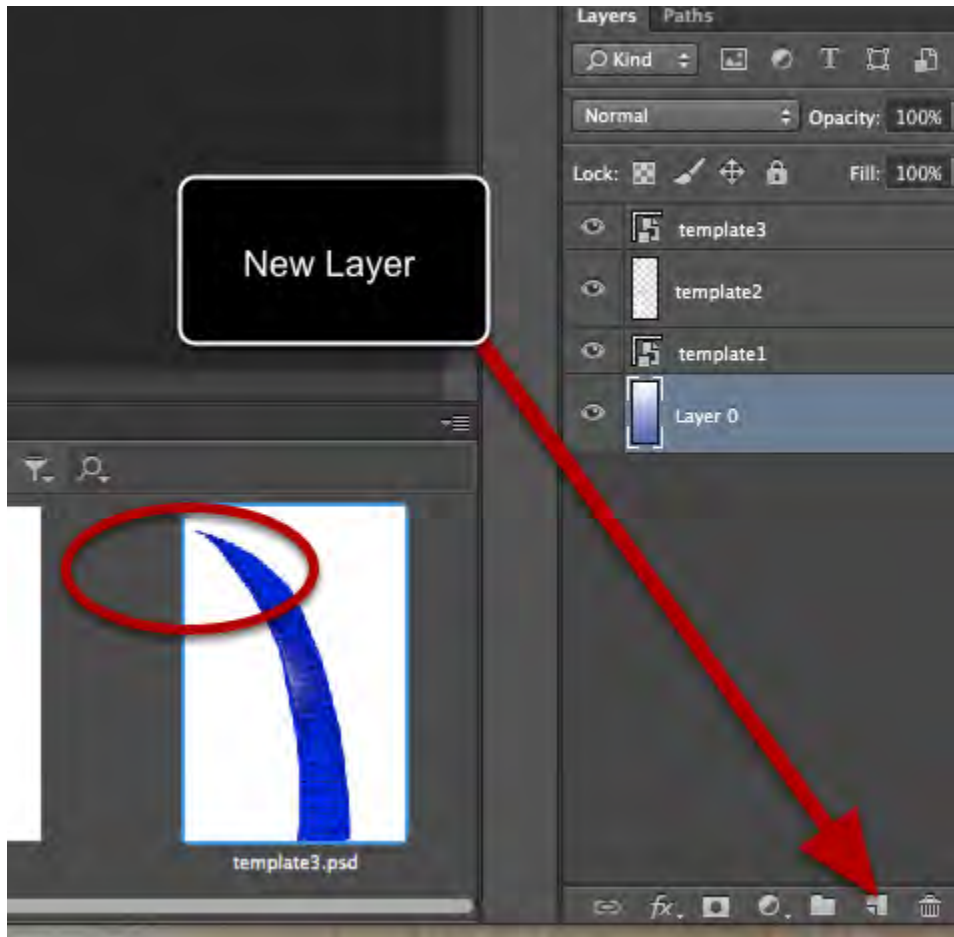

Unlock the background layer so you can edit it.

**Set Gradient Tool and choose your colors. Draw the line from bottom to top.**

Set Color and Gradient Tool

**Finish placing objects each into a new layer**

## Lock Layer 1 and Move Layer 2 to the top
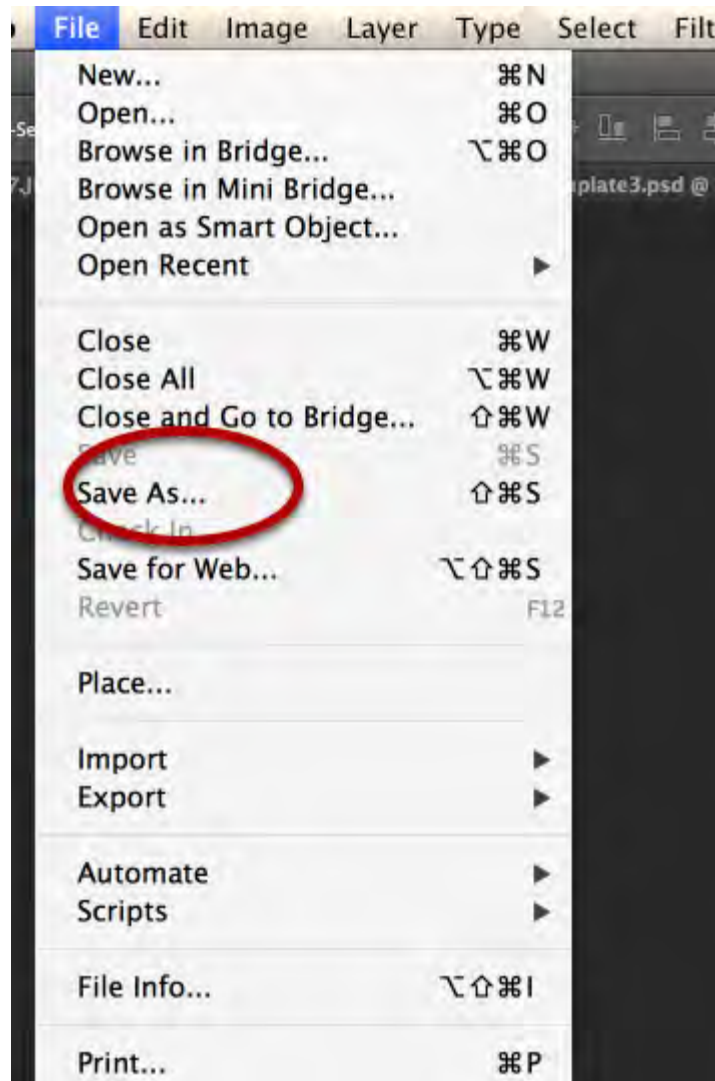

Be creative how you use your images.

Add Effects to the Elements

File Save as Photoshop and then save as a Jpeg

This will open the image in Photoshop and the change will be instantaneous.
