#### **Photoshop Tools Explained**

http://www.photoshopsupport.com/photoshop-blog/dl-blog/tool-chart-1/photoshop-tool-chart.gif

#### Open up two images from the bridge, your picture and the picture of Obama

## Use the Magnetic Lasso tool and select Bernanke

Be sure it is a tight fit.

# Right Click on the selected image and choose Fill

2		•
- 10 C	Deselect	
100	Select Inverse	
35	Feather	
1	Refine Edge	
	Save Selection	
	Make Work Path	
	Layer Via Copy	
	Layer Via Cut	
	New Layer	
	Free Transform Transform Selection	
	Fill	
L	Stroke	
	Last Filter	
	Fade	
	Render	

#### Choose content aware

Content			OK
Use:	Content-Aware	÷	
	Custom Pattern:		Cancel
Blendin	g		
Mode:	Normal	\$	
Opacity:	100 %		
Dracar	ve Transparency		

# Now use the clone tool to clean up the picture

Finished Image after using the clone tool.

#### Use the magnetic lasso tool to select around yourself.

Using the magnetic lasso tool draw a shape around the person. Use the delete button to remove a point that does not match what you want selected.

Open the Obama image and create a new layer.

Press the picture of the paper to create a new layer.

Copy and paste your selection into the Obama Image on the new Layer

Go back to your picture and copy the selection. Paste it into the layer for the Obama image.

# Use the eraser tool to clean up edges around yourself.

### Use Edit Free Transfrom to resize your image

Hold down the shift key to resize and then move the image to the appropriate place.

Double click on the image when you are done to put it into place.

Use the Dodge and Burn tool and the smudge tool to match the lighting.
